Scoliosis Measurement Form

Pro-Tech Orthopedics

Pro-Tech is a custom orthotics manufacturing facility that has been in business since 2003 and aims at being the provider of the best quality custom orthoses for idiopathic scoliosis, neuromuscular scoliosis, and other pediatric and adult orthoses.

Other spinal orthoses we specialize in include trauma, post, and pre-op braces. In the lower limb area we provide custom orthoses with everything from KAFO, KO, AFO, CROW, to name a few.

We are proud to announce Sensory Dynamic Orthosis (SDO)...(SDO) is a made to measure product, designed and produced to the finest detail to provide dynamic compression to increase sensory and proprioceptive feedback and provide musculo-skeletal support. Please visit the Product page for more details.

We would appreciate an opportunity to show you that we are a reliable alternative to your current supplier that will prove to be competitive in pricing, service, and quality.

Introducing The Achilles Contracture Management Orthosis, ACMO

In addition to our quality custom orthoses, we offer hundreds of different fabrication materials for orthotics manufacturing, from plastics to stockinette. We consult professionals in the field regarding fitting issues and have provided countless patients with the most comprehensive orthoses to improve their quality of life.

- ❖ *Total Contact*
- ❖ *Ambulatory Boot*
- ❖ *Adjustable Angle at Ankle*
- ❖ *Removable*
- ❖ *Life After Dorsiflexion is Achieved (night splint)*
- ❖ *Billable Standard L-codes*

Sensory Dynamic Orthosis

The Sensory Dynamic Orthosis (SDO) is a made to measure product, designed and produced to the finest detail to provide dynamic compression to increase sensory and proprioceptive feedback and provide musculo-skeletal support.

This lycra garment can assist and lead to motor learning and neural integration.

Through the use of a SDO providing constant support and sensory information the patient is given the effect of therapeutic handling for the time that the garment is worn.

The excellent stretch quality of the Lycra material used in the fabrication of the SDO can provide and improve:

- *Sensory and proprioceptive feedback*
- *Musculo-skeletal support and alignment*
- *Postural control and proximal stability*
- *Quality of movement*
- *Function*
